

Evaluation objectives (simplified)

metric	{ name : Delay
metric	{ name : Throughput measure : median }
conv.	{ expected : True confidence : 95% tolerance : 5% }
KPI	{ percentile : 25th perc. confidence : 75% }
var. score	{ percentile : 75th perc. confidence : 75% }

Data collection

TriScale

Run

§4.1

Series

§4.2

Sequel

§4.3

Design

Is runtime
long enough?
'has_converged'

How many runs? '#runs'
When to run? 'span'

How many series?
'#series'

Analysis

Compute
metrics

Compute
KPIs

Compute
variability score

Design report (simplified)

runtime : 30s
has_converged : True
#runs : 5
span : anytime
#series : 3

Performance report (simplified)

KPI [111.8, 112.5,
111.945, 110.6,
111.0]
var. score 1.89 Mbit/s
